

Spot-Free Vehicles

Economical Electric Wash Units

- Wash service vehicles without wiping or drying
- Save costs
- Save time
- Enhance CSI with happy customers

Add the new SoBrite high pressure electric unit to your SoBrite wash system and wash cars indoors, spot-free, all year long. Choose from two different models; each allows you to wash cars with soap and rinse with spot-free water. With no wiping necessary, service vehicles can be sent out the door quickly. Deluxe Model 2350 has a hose reel and all controls enclosed in a cabinet with stainless steel panels. Model 2300 uses the same heavy duty components in a more economical package. Select the model which best suits your needs today.

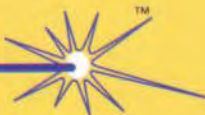

We make **you** and **your cars** look good!

An O.E.M. approved supplier.
